Building the Platform for Success

The Next Step in Precision Ag Has Arrived

FarmPRO combines the ViperPro state-of-the-art display and control system from Raven Industries with sub-inch accurate RTK AutoSteer from AutoFarm. FarmPRO offers a feature rich steering and application control system that is conveniently displayed at the operator's finger tips through a single large screen display.

Get More Done, Faster and More Efficiently from Day One

FarmPRO is a multi-tasking marvel that integrates unmatched application control with unparalleled RTK steering – all running on a single screen. FarmPRO will reduce operator stress and fatigue while letting the driver concentrate on the job at hand. The FarmPRO system, using the industry leading ViperPro display, excels in applications like spraying, spreading and seeding, while automatically steering at an RTK sub-inch accuracy.

FarmPRO Features:

- WAAS to RTK steering accuracy options
- As-applied maps
- Tilt correction & terrain compensation
- Variable rate control of up to five products
- Automatic boom height control
- Automatic boom section control
- Large 10.4" color touch-screen display
- Wireless capabilities
- Windows XP operating system
- Shape file format export from back office software
- Data transfer via USB key
- Auto calibration of steering and application functions

RTK Steering

- Logic 7D technology for steering accuracy
- Reflex technology minimizes treeline outages
- Low profile to avoid tree limbs, doorways, etc.
- Easily mounted on most vehicles
- Easily swappable across vehicles

ViperPro Features:

- 10.4" sunlight readable, color touch-screen
- Variable rate control of up to five products
- Total boom management (AccuBoom and AutoBoom)
- Create color coverage and as-applied maps on the go
- Create field boundary maps
- Integrates with the Spectrum WatchDog
- Wireless capabilities
